### Industrial & Commercial Applications

#### **Restaurants, Grocery & Liquor Stores:**

Restaurants and grocery stores can benefit significantly by using Spill Solved. Mopping floors requires time, effort and money spent on expensive degreasers.

- Degreasers have to be purchased frequently and can be very expensive.
- Degreasers cause damage to grout and can ruin tile floors.
- Grease traps cause odor, they can be overfill and become very messy. They can also be expensive to have drained and kept clean.
- Grease traps can also attract insects and cause pest control problems.
- Using water to mop floors attracts flies, gnats and other insects because they are attracted to the standing water and moisture that is left behind.
- Cleaning up spills of liquor behind the bar or in a liquor store can be very difficult. Usually, using a mop-and-bucket ends up leaving a sticky residue that can last for months.
- Some liquor spills like wine or grenadine can leave a stain that even bleach can't remove. Spill Solved can remove these stains in seconds.
- Spills in grocery stores can be a major slip-and-fall liability. It is very important to get the spill cleaned up immediately and for the affected area to be dry and safe for foot traffic. A "slippery-when-wet" sign can be an invitation to someone seeking a lawsuit.

#### ***Spill Solved is the solution for all of these and other issues because:***

- It can reduce or eliminate odors and insect problems.
- Eliminates tile damage, sticky floors, bar stains and the need for degreasers.
- It can reduce or eliminate the need for grease trap maintenance.
- It works instantly, and it will leave the area dry and immediately safe for foot or vehicle traffic, reducing slip-and-fall liability.
